Ashley Action!

Year 9 Dive into the Loch Ness Mystery! 9LQ have started working on their very own Loch Ness Monster PowerPoints. Students have been busy planning their introductions and deciding exactly how their projects will look. It has been great to see them picking out eye-catching images and using clear subtitles to organise their work. They are off to a flying start and we can't wait to see their final presentations on the mystery of "Nessie"!

Year 10 & 11 Careers Day Our students had a fantastic time exploring their future possibilities during our recent Careers Day. Year 11s got an inside look at local industries, from the cutting-edge roles at Daresbury Laboratory to the specialised trades of building restoration with The Forshaw Group. They also picked up expert tips on starting a business and navigating the local job market. Year 10s joined in for a lively Careers Fair and were asking fantastic questions and making the most of these connections.

7LA Taco Takeover! 7LA students have been busy making delicious chicken tacos using air fryers! This was a great way for them to learn how to cook crispy, healthy food quickly and safely. The students did a brilliant job seasoning their chicken and preparing fresh toppings. It's wonderful to see them building their kitchen skills and using modern gadgets to make such tasty meals. Well done Year 7!

During their PE sessions, Year 9 have been diving into the fast-paced world of indoor hockey. The focus was on mastering the unique rules of the indoor game, specifically the "no-lifting" rule and the strategic use of the sideboards. Students showed impressive discipline and spatial awareness as they practised controlling the ball in tighter spaces and executing precise "push passes" rather than full swings. It was fantastic to see such high levels of sportsmanship and tactical thinking as they adapted their skills to a different environment.

Year 9 Discovery Day: World Museum Liverpool Our Year 9 students recently enjoyed an inspiring visit to the World Museum in Liverpool, bringing their classroom learning to life. Throughout the day, they explored a vast range of exhibits, from the fascinating secrets of Ancient Egypt to the wonders of the natural world and the Planetarium. Students showed fantastic curiosity and represented the school with pride, asking insightful questions and engaging deeply with the displays. It was a wonderful opportunity for them to explore global history and science in such a world-class setting.

Skills Builder Challenge – Problem Solving

Imagine that you need to plan a fun activity for a group of people that you've never met before. It can be any type of activity, just something that you think everyone would enjoy! What information could you use to help plan this activity? What questions could you ask to help you plan the activity?
