Year 12 Work Experience Programme – Employer Engagement Update We're delighted to share that eight employers are involved in our Year 12 Work Experience Programme. Their support provides our students with valuable opportunities to explore future career pathways, develop real-world skills and gain insight into a range of professions. A huge thank you to our participating employers for partnering with us and helping to create meaningful experiences for our students and a big well done to all the students who are making the most of this opportunity.

Tag Rugby Fun! Our students had a blast recently during our Tag Rugby sessions! It was wonderful to see everyone practicing their speed, working as a team and showing great sportsmanship. Whether they were dodging tags or scoring tries, every student played with high energy and a positive attitude.

Health and Well-being Day Students recently stepped away from their desks to focus on their physical and mental health during our Health and Well-being Day. It was a fantastic opportunity for everyone to try new activities, from mindfulness and yoga to healthy cooking and team sports. The day was all about learning how to manage stress, stay active, and make positive choices for a balanced lifestyle.

Future Builders: Construction Careers in P4A In our latest P4A lessons, students have been swapping textbooks for blueprints! We've been exploring the exciting world of construction, showing students that this industry offers much more than just site work—it's about engineering, design and teamwork. By using LEGO, students put their engineering skills to the test by designing and building their own detailed construction sites.

Our Year 11 Gardening students took their learning on the road this week with a practical visit to Home Bargains. The trip was a great opportunity for the group to step out of the school and into a retail environment to study a wide array of seasonal plants and professional gardening equipment.

Types of Malware and Cybersecurity Cyber-Smart Students 10L explored the essentials of Cybersecurity, focusing on how to identify and avoid common Malware like viruses and spyware. By learning how these digital threats work, students are better equipped to protect their personal data and navigate the internet safely. We encourage everyone to stay "cyber-aware" by double-checking links and using strong, unique passwords!

Skills Builder Challenge – Teamwork

Think about a time you when you have seen someone struggle with a task or activity they were doing. If this situation happens again, is there anything you can do to support that person? Now think of a time when you were struggling to complete a task or activity. What could someone have done to support you? How would this support make you feel?
